WHEN IN THE **FIELD**

Challenge: Landscape lighting fixtures can weather or corrode over time, especially in coastal environments with high salinity.

Solution: The Evo Collection features UV-tested, corrosion-proof materials that are designed to hold up in harsh climates.

WHEN **DESIGNING**

Challenge: Depending on the material, some lighting fixtures can be obtrusive and detract from the visual effect of a landscape during the day.

Solution: Evo Collection fixtures feature a matte black finish to reduce glare and allow them to blend into the landscape.
